Australia Temporary Fence

Australia temporary fence is a kind of temporary fence manufactured in accordance with Australian Standard AS 4687-2007 Temporary Fencing and Hoardings and is designed to withstand harsh Australian climates.

It is constructed by galvanized welded wire mesh and round tubes, which provides a smooth surface with excellent rust & corrosion resistance performance and a rigid structure that works well for years.

Australia temporary fence is an ideal choice for preventing unauthorized access and is widely used in infrastructure, civil, industrial, commercial & demolition sites, construction sites, accident spots and a wide range of major public events.

Features & Application

Features

⊕ Smooth and elegant appearance

The surface is well treated to eliminate all burrs for safe installation and removal.

⊕ Solid and strong base support

The concrete inside the plastic feet provide a solid and strong base support for the temporary fence.

⊕ Full hand welding technology

This full welding technology provides a strong structure to extend its service life and prevent breakage.

⊕ Easy installation and removal

All assemble and disassemble work can be done by one single person without digging holes, which saves both time and labor.

⊕ Excellent applicability

It can be placed on a variety of grounds including soil, sand, asphalt and concrete surfaces.

⊕ Great cost effective

It can be installed and removed for many times and for different uses.

Application

Australia temporary fence is widely used in infrastructure, civil, industrial, commercial & demolition sites, construction sites, accident spots and a wide range of major public events.
